

Pranav Vishnu Bane

Frontend Developer

Diva (E), Thane – 400611, India | +91 9321664393 | pranavbane777@gmail.com

PROFESSIONAL SUMMARY

Frontend Developer with 2.4 years of experience building scalable and responsive web applications using React.js, JavaScript, HTML5, CSS3, Bootstrap, Metronic, and REST APIs. Experienced in dynamic UI development, API integration, data visualization, performance optimization, and cross-browser compatibility. Familiar with Node.js, Express.js, authentication, and backend fundamentals. Passionate about creating user-centric applications and continuously expanding full-stack development skills.

PROFESSIONAL EXPERIENCE

Scan Infotech Private Limited

October 2023 – February 2026

Jr. Software Developer (2+ year Experience)

- Improved user engagement by 90% by building fully responsive web applications using HTML5, CSS3, JavaScript (ES6+), Bootstrap, and Metronic, ensuring consistent cross-browser compatibility across Chrome, Firefox, and Safari.
- Reduced bug escape rate to near zero by conducting rigorous testing and debugging sessions using Chrome DevTools, resolving UI/UX issues before production releases.
- Accelerated feature delivery by 80% by writing clean, modular, maintainable React.js components and participating in structured code reviews following UI development best practices.
- Enhanced data comprehension for end users by implementing interactive data visualization dashboards using Chart.js and JavaScript (ES6+), replacing static reports with dynamic, real-time graphs.
- Improved data accuracy and accessibility across 10+ modules by integrating REST API endpoints for dynamic content rendering, collaborating closely with backend developers on client-server architecture.
- Maintained 100% markup quality by ensuring valid, standards-compliant HTML5/CSS3 code conforming to industry and design principles guidelines throughout all projects.
- Streamlined team collaboration and release management by managing feature branches, pull requests, and code merges using Git/GitHub version control workflows across all active projects.
- Delivered pixel-perfect, device-agnostic interfaces by applying UI/UX design principles and human-computer interaction best practices, optimizing layouts for mobile, tablet, and desktop viewports.

Technical Skills:

- Frontend:** HTML5 | CSS3 | JavaScript (ES6+) | TypeScript | React.js | Next.js | Bootstrap | Metronic | Material UI | jQuery
- Backend:** Node.js | Express.js
- Tools:** Git | GitHub | Postman | VS Code | Redux | Redux Toolkit
- Concepts:** Responsive Web Design | Cross-Browser Compatibility | API Integration | REST APIs | JWT Authentication | SQL | CRUD Operations | Client-Server Architecture | Asynchronous Programming | Database Design Fundamentals

EDUCATION

B.Sc. in Computer Science – S.I.W.S College, Mumbai

Bachelor of Science in Computer Science with Distinction

July 2020 - May 2023

(CGPA - 7.81/10)

PROFESSIONAL PROJECT

1. Calbio

- Developed a responsive web application using modern UI technologies.
- Integrated APIs to fetch and display dynamic data.
- Delivered an enterprise dashboard with dynamic charts, multi-step form validation, and CRUD operations — improving reporting clarity for end users through visual data transformation.**

2. Smart AMS

- Designed and developed responsive UI components.
- Integrated backend APIs for attendance management.

- Implemented form validation and dynamic data handling.
- Improved application performance and fixed UI bugs.

3. Smart Ticket

- Built ticket management interface with dynamic data binding.
- Integrated APIs for ticket creation and tracking.
- **Implemented time zone handling for accurate date and time management.**
- Implemented validation and error handling.
- Ensured smooth user experience through debugging and optimization.

4. Expense Reimbursement

- Developed forms for expense submission with validation.
- Integrated APIs for data processing.
- Implemented dynamic data rendering.
- **Added time-based validation to restrict and validate expense entries based on specific date/time conditions.**
- Fixed issues to improve application performance.

5. Gamepose

- Created responsive UI for user interaction.
- Integrated APIs and handled dynamic data updates.
- Implemented dynamic calculations for real-time updates.
- **Built a card-based wallet system with real-time balance deduction and recharge via customer number, handling dynamic calculations and live state updates without page reload.**

6. Smart Agreement

- Built agreement management interface.
- Integrated APIs for document handling.
- Implemented validation and improved usability.
- **Enhanced perceived performance by implementing Skeleton UI loading states, reducing user drop-off during API response delays.**

7. Incident Tracker

- Developed tracking system UI for incidents.
- Integrated APIs for real-time updates.
- **Reduced manual location logging effort by integrating Azure Maps for real-time coordinate capture, supporting simultaneous multi-instance map handling across the application.**
- Ensured smooth performance and accurate location tracking.

8. Room Check

- Developed room inspection system similar to a hotel booking application.
- **Implemented features like room availability, selection, and booking flow.**
- Integrated APIs and handled dynamic data updates.
- Implemented validation and ensured smooth user experience.
